

## 2022 Reading Climate Conference Pledges

School	One thing I would like my school to do ...	One thing I will do ...
Bulmershe School	<p>One thing I would like my school to do is to use and implement recycling and food waste bins.</p> <p>Think more about how much and necessary use of energy so that we aren't wasting it.</p> <p>Discuss with the school sustainable alternatives and ways to educate others.</p>	
Denefield School*	<p>Supply recycling bins for every classroom INCLUDING canteen and art departments.</p> <p>Reinforce the separation of rubbish, recruitment of climate activists for enrichment talks, count volunteering in a community gardens as part of community service.</p>	Look into how to join the Youth Council
Highdown School	<p>Take climate action seriously and make it a vital improvement.</p> <p>Use less single-use plastic in our school ie meals, waterways.</p>	Look into Reading Youth Council
Kendrick School	<p>One thing I want my school to do is make recycling clearer and reduce plastic waste.</p> <p>Create an enforced policy for schools regarding Climate Action.</p> <p>Report back to Senior Leaders on this event.</p> <p>Complete the Biodiversity Audit suggested by Natalie Ganpatsingh.</p>	One thing I will do following this event is actively think about the environment in day to day decisions.
Ranelagh School (tbc)	<p>More energy-efficient</p> <p>Invest in renewable energy production (solar panels)</p> <p>Our school should:</p> <ul style="list-style-type: none"> <li>- Eco classrooms</li> <li>- Plant more trees</li> <li>- Teach more about climate change (talk about climate change or have an environment day at school).</li> </ul>	Change your recycling habits and express thoughts to school council.
Reading Girls School	<ul style="list-style-type: none"> <li>- Eco-warriors</li> <li>- Pick up rubbish</li> <li>- Low waste canteen foods</li> <li>- Compost to enrich biodiversity</li> <li>- More greenery</li> <li>- School garden/greenhouse</li> <li>- Less cardboard waste and paper usage</li> </ul>	

### One thing I want decision-makers to do ...

....is to meet their own targets and prioritise change over re-election

... prioritise climate change in policy eg UK law that all new buildings must be carbon neutral / renewably powered.

... is prioritise climate overall and follow through with their pledges and not to just give up.

## Inspiring the next generation of climate leaders
